This is a fictional information security policy for the HR assistant demonstration. It applies to the mock employees in the supplied dataset. The employee initiates the request, the manager reviews operational impact, and HR or the relevant specialist confirms exceptions.

## Procedure

Read this rule before making a request. Confirm the relevant employee record and provide only the facts needed for review. Where a rule depends on a balance, role, amount or document, verify that fact through the appropriate tool or responsible owner. If a fact is missing, request clarification.

## Control and escalation

Keep policy evidence with the response using this page and section identifier. No assistant response grants approval, updates an official personnel record or commits funds. Route uncertain or exceptional cases to the accountable reviewer. A saved ticket documents a request only.

## Example and review

An employee asks about devices and networks. The assistant retrieves this section, states the applicable rule and identifies missing information before preparing any follow-up. The reviewer checks the request against the cited version. HR owns changes to this demonstration rule; the effective date and version identify the material used.
